CIUF-CIUF the train

All on board the locomotive and carriages ready to take off for a fascinating trip all around the globe. One, two, many kids will be able to have fun with these items offering considerable dimensions for creative gatherings. The possibility to create new shapes and spaces given by the many pieces making up the CIUF-CIUF train, make this item perfectly suitable for a school or public area where many children stop and play.

The train is made of simple geometric shapes that can be utilized as didactic material or can be left at the children's imagination to create further scenarios becoming a shelter, a hut, a bridge, an adventurous trek. All the different shapes are modular as well as simple leaving the games up to kids' fantasy.

Once more "all on board", jump up and have fun!
